

AQUA PHASE ELECTRICAL PTY LTD

INDUSTRIAL ELECTRICAL SERVICES

Breakdown Support • Fault Finding • Maintenance • Machine Electrical

Reliable electrical support to keep your plant, machinery and production equipment operational.

Aqua Phase provides industrial electrical services to manufacturers, engineering workshops, processing facilities and machine-dependent businesses across metropolitan Adelaide.

We support businesses that require responsive fault finding, practical repairs and ongoing electrical maintenance. Whether you need assistance with an urgent machine breakdown, an intermittent electrical fault, planned maintenance or additional support for your existing maintenance team, Aqua Phase can help minimise downtime and restore equipment safely and efficiently.

CORE CAPABILITIES

- Industrial electrical breakdown response
- Machinery and production-equipment fault finding
- Electrical control-circuit diagnostics and repairs
- Three-phase motors, motor starters and overload faults
- Variable frequency drive—VFD—diagnostics, replacement and commissioning
- Contactors, relays, timers, sensors and solenoid faults
- PLC input and output fault diagnosis
